DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims have a limitation of a “shutter to selectively allow said magnetic domain of said magnetic storage medium”. However, nowhere in the Specification does it address how the medium is attached and how the medium behaves when it is allowing or inhibiting the magnetic flux of the write coil. The Specification mentions actions of “open” and “close”, but these descriptions are insufficient for one of ordinary skill in the art to understand how is this “shutter” working in the head in order to selectively allow the magnetic field to alter this magnetic domain. See *In re Wands*, 858 F.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1998) as appropriate. See also MPEP § 2164.01(a) and § 2164.04. Hence, there would be undue experimentation to make and use the invention.

Response to Arguments

3. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new grounds of rejection. However, this Claims now stand rejected under 35 USC 112, 1st Paragraph.

Art Unit: 2651

4. Claims (3-5 and 16-18) considered allowable subject matter in previous office action are now rejected in view of the rejection cited above herein.
